

\$KIND

Happy Kind Token Whitepaper

Introduction

At Happy Kind, our aim has always been to create an ecosystem that fosters joy, inclusivity, and a sense of belonging. As we look to the future, we see an exciting opportunity to do so through the evolving landscape of blockchain technology and cryptocurrencies.

We are thrilled to introduce \$KIND, a blockchain coin for the Happy Kind community with the aim to include everyone from children to adults in a unique rewarding system. The token operates on the Polygon chain, a commonly used chain in the crypto world.

Vision

The vision for the \$KIND token is to create a unique and valuable platform that both rewards our community members and serves as an interactive educational tool about blockchain technology and cryptocurrency transactions.

Technology

\$KIND, an MRC-20 token, is based on the Polygon blockchain. We chose the Polygon chain, which is also used by multinational companies such as Coca-Cola, Starbucks, and Reddit, because of its existing reputation of high availability and security, along with low gas fees.

\$KIND Tokenomics

The \$KIND token has a mintable and burnable mechanism. It means we control the creation (mint) or destruction (burn) of \$KIND tokens based on relevant activities in our ecosystem. Tokens are awarded for purchases within our Happy Kind affiliated businesses, and the tokens can be traded on the DEX, Uniswap.

WARNING: trading \$KIND is experimental and experiential. As \$KIND is listed on the DEX, trading it might incur losses, and customers must understand and accept that they trade at their own risk. Happy Kind cannot be held liable for any trading losses incurred.

Every trades transaction will contribute a total of 3% to marketing, development, and charity. This fee is broken down as follows:

- 1% Marketing Fee: This fee supports further growth and branding initiatives to increase the visibility and value of \$KIND.
- 1% Developer Fee: This fee goes towards maintaining the code, making necessary upgrades, and ensuring secure, seamless transactions.
- 1% Charity Fee: A portion of this fee will go towards our Happy Kind Giving wallet to help charities.

Redemption Party

Holders can use their tokens as shopping credits or exchange them for physical goods within the Happy Kind affiliated businesses. This way, we create a unique reward system for our dedicated patrons while also engaging them in the intriguing world of blockchain and cryptocurrency.

Roadmap

Phase 1 - Token Development: Develop \$KIND as an MRC-20 token on the Polygon Chain.

Phase 2 - Implementation: Integrate the \$KIND token into the Happy Kind loyalty system for it to be earnable through purchases.

Phase 3 - Education: Launch educational initiatives to help our community understand how \$KIND, the blockchain, and cryptocurrencies work.

Phase 4 - Partnerships: Establish more partnerships, to provide our community with easy ways to trade, earn and redeem \$KIND tokens.

Phase 5 - Ongoing Development: Continual betterment of our ecosystem based on community feedback and market trends.

Conclusion

The \$KIND token aligns with Happy Kind's philosophy of joy and inclusivity. Through \$KIND, we aim to create a valuable, fun, and educational platform that strengthens our community and broadens understanding of the increasingly significant world of blockchain technology. With this significant step into the future, Happy Kind stands not just as a provider of excellent products and services but as an active participant in our customers' journey through the crypto marketplace. We believe that \$KIND is more than a token — it is a token towards better humanity.
